

Senatorial vote needed for the settlement on no electricity for 3 weeks , which was overly unreasonable length of time causing bodily damage to G.R. Stewart

Outline for the Dominion Resources Damages North of Old Dominion campus who didn't respond to the need for accommodation due to it either, when contacted in 2005 about it. We do not know the employees who were neglecting our calls at Dominion Resources. The outage line was answered usually.

1. 2003 Hurricane Isabell causing full electrical outage from 4 minutes of rain and high wind in our area. EDGEWATER AT MAGNOLIA & POWAHTAN AVE. Went without power for 3 weeks on McLean Ave. Even though they Dominion Resources were notified by Ms. Stewart daily.
- 2 .Phoned Dominion Resources daily and was told that the other neighborhoods were more important.
  1. Temperatures in the second level are quite warm for humans in the Fall here. Air conditioning was being used and required through November. Sun heats things up.
  2. Don't tell me we couldn't have had our electricity
  3. After one week the College plus one block area had their power, 5 blocks away they had electricity and we didn't.
  4. Persistently called daily and no one came to reconnect it for 2 more weeks. Not knowing the expected day of restoration we could even- expect kept us from going to a Hotel as we got the impression it would be on at any time. It was as if we were the wrong planet and we didn't know they thought it. The outage line was used and a live person answered ,female .
  5. By Nov.11 after climbing the 13th stair that day , the heat had collapsed a disk too much- and no walking was then possible nor moving due the extreme pain caused by the softening and breaking of the disk. Cool was part of the management for the past 5 yrs. and no collapses had occurred.. since the acorn jogger incident and the campus act of violence the day before it NOV.98'
  6. It is medically 3 times worse each time a Disk- breakage occurs and so far the second one did take three times as long to stand and walk. The recovery is less than the prior one and the resulting pain is worse and longer and happens easier now than before. It was 6 mos. before a step was taken or even a weightless chair was sat in .6 more additional months to try and walk again. This was not a condition to return to classes or work, and permanent damage had occurred physically. Not just financially on the computer because of no electricity.
  7. So....another collapse could be crippling to not walking ever again or 3 yrs. of recovery time. Next time and is now more susceptible to another collapse than before the unreasonably long Dominion Resources neglectful outage at this address.

Senatorial vote needed for the settlement on no electricity for 3 weeks , which was overly unreasonable length of time causing bodily damage to G.R. Stewart

8. Unreasonable amounts of time must be acknowledged and damages paid to the victim G.R Stewart in the amount of comparable numbers as the **McDonalds** case from overly hot cups of coffee causing third degree burns. However this damage is 3 times worse than those 3rd degree burns. Since The McDonalds case settled for\$ 10.85 million dollars and paid 30% to the victim and we would settle for a 30% deposit now of \$33 million dollars from this Dominion Resources case payable to G.R. Stewart 1520 McLean Ave. Norfolk Va. 23508 Christmasegg 757-423-2196

cc Abby Witt In request of assistance from the President for a senatorial vote since no one would help G.R. Stewart with this complaint to Dominion Resources.

cc.Ken Schrad of SCC.gov.
